

The image shows a large grid of mathematical symbols. The grid consists of 10 columns and 10 rows of symbols. Each symbol is a small, stylized 'A' or 'H' shape with a '+' sign inside it. In the first column, there are 17 such symbols. In each subsequent column from the second to the tenth, there are 5 of these symbols. This visual representation corresponds to the addition problem 17 + 5 = 22.
